UNITED STATES 3.0 *THE OBAMA ERA FROM THE SPANISH PERSPECTIVE*

Madrid, 2 October 2012. Is the USA the world power of the 21st century? Has Obama dashed hopes? Does the Republican Party offer real alternatives? Is US society split by the Tea Party and Occupy Wall Street? Are the middle classes doomed and capitalism in crisis? What is the state of US-Spanish relations?

This book by the journalists Rafael Barberá and Miguel Ángel Benedicto seeks to answer those questions and many others regarding the present and future of the USA. They interviewed 40 leading US observers from different perspectives and they analyse the future of North-America from a Spanish outlook.

The individuals interviewed for the book include Antonio Camuñas, Global Strategies chairman, who believes "the book provides a very comprehensive snapshot of the US situation and its publication is particularly timely in the run up to the Presidential elections".
